

Automation Delivery and Program Management Services

RPA365

Accelirate's RPA365 is a comprehensive RPA Program Management and Automation Services Delivery offering. This service allows Clients to either augment their existing teams or enter into a strategic partnership with Accelirate to help them scale their RPA Programs; With process automation as our sole focus, Accelirate's business centers around RPA & AI.

A common problem in the Industry is the failure to realize that building a few bots and building an ROI-driven, large-scale, business RPA program are two completely different challenges. However, this is what Accelirate does best. We have a comprehensive RPA methodology that includes standard templates for all aspects of an RPA Program including: Process Discovery, Process Analysis, Automation Development, Deployment, and Support. We are also able to adapt to our client's methodology if an RPA program has already been defined.

The size of the team we assign to a project is based on the project work volume. Sample team breakdowns can be seen in the chart below. As illustrated, size and makeup are based on tiers of process automation projects being addressed within the scope of the engagement.

Sample Process Automation Delivery Timeline Matrix					
Number of Processes	Number of Complex Processes	Solution Architect(s)	Process Analysts	RPA Engineers	Estimated Total Delivery Timeline
10	Up to 2	1	3	6	5 months
20	Up to 4	2	5	12	7 months
30	Up to 7	3	7	16	12 months

Accelirate can also propose a fixed price model based on process complexity or use the traditional T&M pricing model. Below is an outline of how we determine the complexity of a process. We are open to discussion on this criterion and will be able to accommodate minor changes as requested by our Clients. The tables below give you an idea in terms of how we size the Automation Projects within our RPA365 Service offerings.

Sample Process Complexity Matrix			
Criteria	Simple	Medium	Complex
Process Steps (# of steps in job aid/ work flow)	Up to 25	Up to 50	50+
Rules Complexity	Simple Rules and Validations; 2-3 Simple Exceptions	Medium rules and validations; Simple Exceptions.	Complex Rules, Multiple Validations and Nested Exceptions
Apps	Up to 3	Up to 4	5+
App Screens (Fields)	Up to 5 (Up to 20 Fields)	Up to 10 (Up to 40 Fields)	10+ (40+ Fields)
App Technology	Any of the following: Windows (including SAP), HTML	Any of the following: Windows (including SAP), HTML, Java	Custom (Mainframe, Citrix, Surface Automation)
Available Building Blocks	Majority: Reuse Existing Components	Partial: Need to Develop New Components	Few: Need to Develop a Majority of the Components
# of Output Files	Up to 2	Up to 5	5+
Process Scheduling	Simple	Dependencies or Simple	Complex

Phase Durations in Weeks			
Phase	Simple	Medium	Complex
Analysis	1	2	2
Development	4	6	9
UAT	1	2	3
Total Weeks Elapsed (With Overlaps in Phases)	5	9	13

Engagement Models & Pricing

The Engagement models for the RPA365 Service Offerings are as follows:

- Hybrid Teams: Accelirate augments Client Teams with the Accelirate Team through our deep Consulting Capabilities
- Project/Outcome based: Accelirate quotes fixed price projects based on certain outcomes. Alternatively, Accelirate can also engage via the traditional T&M pricing
- Delivery Models:
 - o Onsite (Client Location)
 - o Accelirate Delivery Centers in U.S.
 - o Offshore (Offshore is offered for price competitiveness and is Optional)
 - o Hybrid of all or some of the above

Having RPA & AI as our sole focus has allowed us to develop deep expertise within this technology. We believe that our singular concentration on this specific technology vertical has allowed us to build a company that has all its operations designed around this vertical. For more information on us or our RPA365 program please contact us at info@accelirate.com.
