

# RPA365

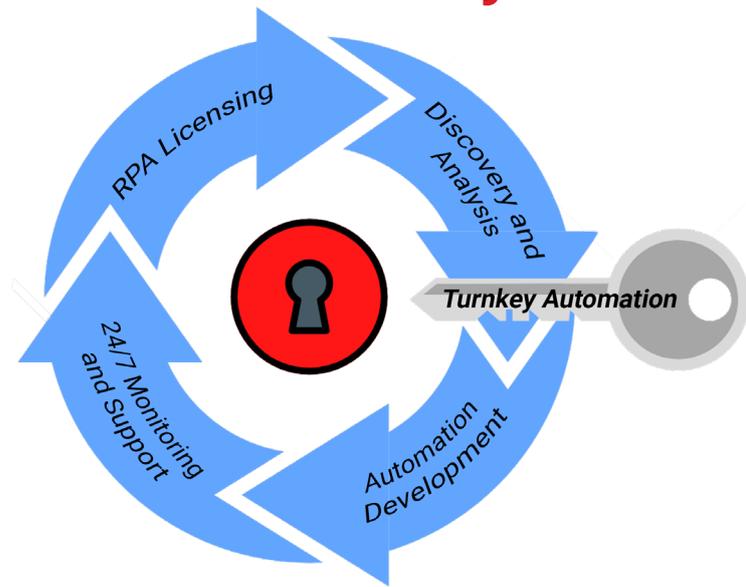

Convert Your Automation CAPEX to OPEX

As the demand for RPA and AI Technologies continues to grow, budgeting capital expenditures for RPA and AI software investments is sometimes challenging in today's environment. **RPA365** allows companies to **convert their RPA Capital Expenditures to Operational Expenditures** by combining Software Licensing, Implementation Services and Accelirate's ROC (Robotic Operations Center) into an innovative outcome based pricing model that delivers ROI.

The main challenge to achieving **RPA at scale** within an organization is the heavy upfront costs required that prevent an enterprise from realizing the returns of their investment until far later down the line. Similar to the inevitable shift in the technology industry from **infrastructure sales to cloud sales**, clients prefer to pay just **one monthly fee** for all their automation needs and realize the outcomes as they pay. Accelirate sees the value in helping their clients "Own their Outcomes" while providing all the aspects necessary to build a successful RPA Program including, Process Discovery, Analysis, Documentation, Infrastructure, development, and 24/7 monitoring and support. Similar to Leasing a Car rather than buying, this continuous automation subscription provides new automations on a regular basis, thus scaling your digital workforce and furthering your digital transformation while simultaneously increasing ROI.

## RPA365 Lifecycle

## RPA365 Methodology

### Ongoing Automation Support

#### RPA Infrastructure

##### Bot Licenses

##### PROCESS ANALYSIS

- Process Definition
- SLA Definition
- Escalation Procedure

##### PROCESS DEVELOPMENT

- Solution Design
- Process Design
- Tech Architecture
- E2E Configuration

##### TESTING AND DEPLOYMENT

- Automation Development/Training
- UAT Support
- Deployment Support

By combining the **services and licensing into one package**, the business has the ease of paying only one fee to enable their entire automation program. With RPA365, Accelirate handles the challenge of managing the licensing and infrastructure fees and metrics required to fully equip the RPA analysis, deployment, and development teams, removing the hassle from the client's side. RPA365 Also Includes:

- **Accelirate's AutomationNavigator** - Robotic Process Management Assessment and Storage Tool
- **Accelirate's TextXtractor** - AI-Based Text Classification and Extraction Training Tool
- **Accelirate's Atlas** - RPA Enablement and Delivery Program

This Automation Program Subscription Service enables any organization to grow their program consistently and at scale. With RPA365 digital transformation comes easy, providing tangible goals and note-worthy ROI. For more information on Accelirate's RPA365 or any of the Accelirate Tools included in the program, please contact [info@accelirate.com](mailto:info@accelirate.com).
